Post-Event Report: Baraget Forest Tree Planting Campaign 2026 – Phase One

1. Event Overview

Event Name: Baraget Forest Tree Planting Campaign 2026 – Phase One

Organized By: Youths for Green Action – Kenya

Dates: 28th April 2026 – 1st May 2026

Location: Baraget Forest

Number of Trees Planted: 50,000 tree seedlings

Total Acreage Covered: 20.2 Ha (49.9 acres)

Participants: Community members, Government officials, KFS & CFA officers, Youths for Green Action team

Sponsors and Project Patrons: German Imaging Technologies, Victoria Furniture / The Design Gallery

2. Background & Objective

This campaign marked the launch of the first phase of reforestation mission at **Baraget Forest**, a vital ecosystem that has faced degradation due to human activity and environmental pressures.

The campaign was effectively implemented with strong support from the student volunteers, Community Forest Association, local women, and youth groups—placing community ownership at the center of restoration.

Objectives:

- Restore forest cover with both exotic and indigenous trees
 - Protect riparian ecosystems and promote climate resilience
 - Foster local ownership of environmental stewardship and management
 - Build stronger partnerships between public benefit organizations (YGAK), academic-development partners, and the private sector
-

3. Execution Summary

The campaign was conducted over five days, beginning with an official launch on **29th April 2026** and concluding on **1st May 2026**.

A total of **50,000 tree seedlings** were planted:

- **40,000 exotic species** for forest regeneration and timber sustainability
- **10,000 indigenous species** along riparian zones to restore biodiversity and protect water systems

Over 100 community members participated in the launch, with consistent engagement throughout the exercise. The presence of government and forest officials reinforced the importance of restoring Baraget Forest as a key ecological asset.

Support from partners played a crucial role in enabling logistics, coordination, and amplifying the role of youth-driven environmental action.

4. Participation

- **Community Members:** 100+ actively engaged
- **Government Officials:** Participated and provided oversight
- **Youths for Green Action:** Core organizing and implementation team
- **Women & Youth Groups:** Led daily planting efforts
- **Community Forest Association (CFA):** Community mobilization and coordination
- **Project Sponsors & Patrons:** Victoria Furniture, The Design Gallery and German Imaging Technologies.

5. Tree Planting Breakdown

- **Exotic Species**
 - Quantity: 40,000
 - Purpose: Forest restoration blocks
 - Coverage: 16.2 Ha (40.2 acres)
- **Indigenous Species**
 - Quantity: 10,000

- Purpose: Riparian restoration, biodiversity conservation, and water catchment protection
 - Coverage: 4 Ha (9.8 acres)
-

6. Officials in Attendance

Kenya Forest Service (KFS)

- Benard Nkeiywa – KFS Chief Inspector, Nakuru County.
- Francis Kirwa – Forest Manager, Baraget Forest Station.
- Oliver Murgor – Baraget Forest Station Inspector
- Thomas Sitima – KFS Corporal, Baraget Forest Station

Community Forest Association (CFA) (Baraget Forest)

- Aaron Ng'etich – CFA Chairperson
- Sharon Chebet – CFA Chairman
- Laban Kibet – CFA Secretary
- Amos K Mutai – CFA Vice Chairperson

Other Government Departments

Susan Jarenga - Assistant County Commissioner

Julius Cheruyoit - Chief

Julius Kipkorir – Assistant Chief

Mary Olubumbu - Assistant chief

Raphael Tuei – Assistant Chief

YGAK Officials.

- YGAK Secretariat.
-

7. Challenges

- Terrain and accessibility challenges demanded flexibility in logistics and execution
-

8. Successes

- All 50,000 trees successfully planted within 5 days
- Balanced ecosystem restoration through mixed species planting

- Strengthened collaboration between community, government, and partners
 - Increased local ownership of Baraget Forest restoration efforts
 - Demonstrated the effectiveness of youth-led, community-centered environmental action
-

9. Recommendations & Next Steps

- Establish a monitoring framework with CFA and KFS to track survival rates
 - Maintain visibility through storytelling, media, and reporting
 - Move into **Phase Two** to sustain momentum and capitalize on current environmental conditions
 - Deepen partnerships to integrate research, youth engagement, and long-term restoration strategies
-

10. Acknowledgements

We extend sincere appreciation to:

- The **Baraget community** for their commitment and active participation
 - Government agencies including KFS, NEMA, and local administration
 - The **Community Forest Association (CFA)** for coordination and leadership
 - Our sponsors and partners for enabling this initiative
 - The **Youths for Green Action Kenya team** for driving impact on the ground
-
