Message from the Patron

Youths for Green Action Kenya (YGAK) continues to demonstrate the transformative power of youth leadership in advancing environmental conservation and climate action

I am greatly encouraged by the dedication shown by young people, schools, partners, and communities who have embraced environmental stewardship as a shared responsibility. Their collective efforts have translated vision into measurable impact, contributing to ecosystem restoration, strengthened climate resilience, and increased environmental awareness across the country.

Tree planting remains a central pillar of YGAK's work, serving not only as a practical response to climate change but also as a symbol of hope, responsibility, and long-term stewardship. Through school-based initiatives, university chapters, and community partnerships, YGAK is nurturing a new generation of environmentally conscious leaders committed to protecting our natural resources. As you engage with this magazine, I invite you to continue supporting and championing these efforts as we work together toward planting one million trees by 2027 and securing a greener, healthier future for generations to come.

Regards.

Message from the Chairperson

The steady growth and impact achieved over the years reflect the strength of collective action and purposeful leadership within our organization.

I am proud of the commitment shown by our members, partners, schools, and communities who continue to turn environmental ideals into practical action that restores ecosystems and strengthens climate awareness nationwide. Tree planting remains at the heart of our work, serving as both an immediate response to climate challenges and a long-term investment in sustainability through schools, universities, and community partnerships. As you engage with this magazine, I invite you to walk with us as we scale our impact toward planting one million trees by 2027 and building a greener, more resilient future for generations to come.

David Omondi - Chairperson and Cofounder YGAK

Message from the CEO

Youths for Green Action Kenya (YGAK) is a youth-led organization founded in 2018 with a clear mission to empower communities through environmental conservation, education, and advocacy.

Our work is driven by youth-led action to protect ecosystems through tree planting, education, and community engagement. Tree planting remains a core pillar of our mission, symbolizing hope and long-term environmental stewardship. We invite you to join us in safeguarding our planet for present and future generations.

Dennis Asiya- CEO and Cofounder YGAK

Message from Mr Amar Shar

As the CEO and Founder of Victoria Furnitures and The Design Gallery, I strongly believe that business success must go hand in hand with environmental responsibility.

Our work is closely connected to natural resources that inspire design, craftsmanship, and sustainable innovation, reinforcing the importance of protecting the environment through meaningful actions such as tree planting. Supporting Youths for Green Action Kenya (YGAK) reflects our commitment to restoring ecosystems, strengthening climate resilience, and promoting responsible stewardship for future generations.

Tree planting initiatives led by YGAK, including school greening and community-based reforestation, demonstrate the power of collective action in addressing environmental challenges. By engaging young people, schools, and communities, these efforts go beyond planting trees to nurturing a culture of environmental responsibility. As a private sector partner committed to sustainability, I commend YGAK's leadership and collaborative approach, and I remain dedicated to supporting initiatives that safeguard our natural resources and secure a greener future for generations to come.

Regards.

WHO WE ARE:

Youths for Green Action Kenya (YGAK) is a youth-led environmental organization established in 2018 with a strong commitment to climate action, environmental conservation, and sustainable development. We work to empower young people and communities to become active stewards of the environment through tree planting, environmental education, advocacy, and community engagement.

ABOUT YGAK

VISION :

To be a leading force in creating a clean, healthy, safe, and sustainable environment in Kenya by fostering environmental stewardship, promoting a culture of conservation, and inspiring action for a healthier planet.

MISSION:

To empower communities through sustainable environmental conservation, education, and advocacy, while equipping young people with the knowledge and skills needed to drive climate action and protect ecosystems for present and future generations.

Objectives

01.

Promote environmental conservation through tree planting and reforestation initiatives.

02.

Enhance environmental education and awareness among youth and local communities.

03.

Empower young people and communities to lead sustainable and climate-resilient actions.

Core Values

- **Sustainability** – Commitment to long-term environmental protection and responsible use of natural resources.
- **Community Engagement** – Active involvement and collaboration with communities and stakeholders.
- **Education & Awareness** – Promoting environmental knowledge and a culture of conservation.
- **Integrity** – Upholding transparency, accountability, and ethical standards in all actions.
- **Collaboration** – Working with partners to advance environmental conservation and sustainable development.
- **Agility** – Learning, innovating, and adapting quickly to create lasting impact.

Target Audience

- Young people and students, especially within universities and learning institutions.
- Local communities and community-based groups engaged in environmental conservation.
- Educational institutions, environmental stakeholders, and development partners.
- Local and national administrations involved in environmental policy and community development.

Service Avenues

- Tree planting, reforestation, and environmental conservation initiatives.
- Environmental education, awareness campaigns, and sustainability training programs.
- Youth leadership development and conservation advocacy.
- Community outreach, partnerships, and stakeholder engagement for sustainable development.

"Let's protect the natural and cultural treasures passed down through generations. By preserving our green heritage, we ensure a thriving planet for the future."

Annual Growth Milestones

2021

Annual Report

In 2025, Youths for Green Action Kenya (YGAK) continued to demonstrate strong youth-led leadership in environmental conservation through impactful tree planting and ecosystem restoration initiatives across multiple counties in Kenya. Guided by our mission to empower communities through sustainable environmental action, the organization successfully implemented large-scale projects that combined reforestation, environmental education, and community engagement.

Phase One and Two

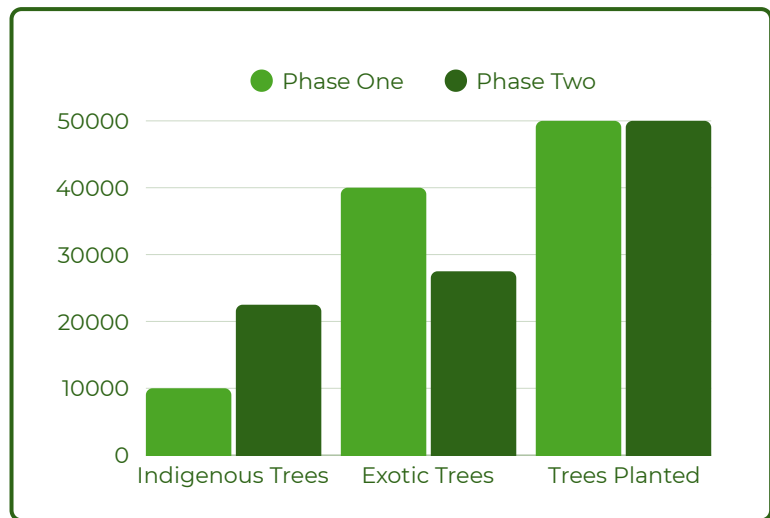

The Kipkabus Forest Tree Planting Campaign marked a significant milestone in YGAK's reforestation efforts in Elgeyo Marakwet County. Implemented in May 2025, the campaign involved coordinated planting activities carried out over a five-day period, during which 50,000 tree seedlings were planted across 49.88 acres of forest land. The initiative integrated exotic species to support forest regeneration alongside indigenous trees planted along riparian zones to protect water catchments and enhance biodiversity. Strong youth leadership and the active participation of over 1,000 community members, including women and youth groups and the Community Forest Association, played a central role in driving the campaign and fostering local ownership of conservation efforts. Strategic partnerships with government agencies, academic institutions, and private sector partners provided essential technical support, coordination, and resources, ensuring alignment with national environmental priorities and laying a solid foundation for long-term forest restoration and collaborative stewardship in Kipkabus Forest.

Greening Schools Initiative

The Greening Schools Initiative is a school-based environmental program that promotes tree planting, environmental education, and climate-smart practices within learning institutions across Kenya. Implemented by Youths for Green Action Kenya (YGAK), a registered non-governmental organization, the initiative engages learners and educators in practical conservation actions that enhance green school environments and foster long-term environmental responsibility. By integrating hands-on environmental activities into school settings, the initiative contributes to Sustainable Development Goal 15 and supports Kenya's Vision 2030 through the nurturing of environmentally conscious and sustainability-driven learners.

Our Approach

The Greening Schools Initiative bridges the gap between classroom learning and practical environmental action. By engaging students directly in tree planting and nurturing, the program strengthens environmental awareness, builds practical skills, and fosters a sense of ownership over natural resources within school communities.

Target Institutions

- Primary schools
- Secondary schools
- Vocational institutions
- Tertiary institutions

Key focus areas

- Tree Planting & Restoration
- Student Participation
- Sustainability Support

✓ Vision

To nurture a generation of environmentally conscious learners actively engaged in the conservation, restoration, and sustainable management of natural resources.

✓ Mission

To promote environmental stewardship in schools by supporting tree planting, environmental education, and student-led conservation actions that contribute to a greener and more sustainable Kenya.

Lenana School

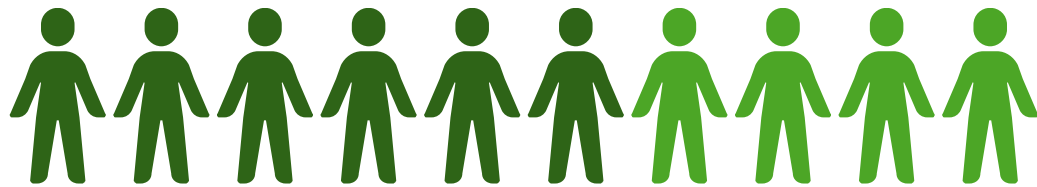

The Greening Schools Initiative at Lenana School, implemented between July and September 2025, marked a key milestone in YGAK's school-based environmental conservation efforts in Nairobi County. Through this initiative, 5,000 bamboo seedlings were successfully planted within the school compound, promoting landscape restoration, climate resilience, and sustainable land use. The activity was driven by strong youth participation, with students actively engaged alongside teachers and school administrators, fostering a sense of environmental responsibility and ownership. Strategic collaboration with school leadership and supporting partners ensured effective coordination, resource mobilization, and alignment with broader environmental education goals. The Lenana School planting laid a strong foundation for long-term tree care, student-led environmental stewardship, and the expansion of climate-smart greening initiatives within learning institutions.

Overview of the Greening Schools Initiative

Across selected learning institutions, the Greening Schools Initiative supported meaningful progress toward strengthening environmental conservation and climate-smart learning environments. Through coordinated school-based activities, thousands of tree seedlings were planted within school compounds, contributing to improved green cover, enhanced learning spaces, and long-term environmental sustainability. The exercises were driven by active student participation, with strong support from teachers and school leadership, fostering environmental awareness, responsibility, and hands-on learning among learners. Effective coordination between Youths for Green Action Kenya (YGAK), school communities, and supporting partners ensured smooth implementation, proper resource mobilization, and alignment with broader conservation and education objectives. These efforts established a strong foundation for sustained tree management, student-led environmental stewardship, and the continued growth of climate-smart greening initiatives across participating schools.

The Greening Schools Initiative recorded significant progress in advancing environmental conservation and climate-smart education across schools in Kakamega County. Through coordinated tree planting activities implemented in selected Kakamega schools, thousands of tree seedlings were planted within school compounds, improving green cover, enhancing learning environments, and contributing to long-term ecological restoration. The activities were driven by active student participation, with learners engaged in hands-on planting and tree care under the guidance of teachers and school leadership, strengthening environmental awareness and practical climate education. Effective collaboration between Youths for Green Action Kenya (YGAK), school communities, and partners ensured smooth implementation, appropriate species selection, and alignment with broader conservation and education objectives. These efforts established a strong foundation for sustained tree management, youth-led environmental stewardship, and the continued expansion of climate-smart greening initiatives within Kakamega schools.

The tree planting activities carried out in Homa Bay County under Phase Four of the Greening Schools Initiative represented a major contribution to climate-smart reforestation and environmental education. A total of 35,000 indigenous seedlings, including *Bischofia*, *Prunus africana*, *Mahamia lutea*, *Croton silvatica*, *Podocarpus*, and *Syzygium*, were planted across seven schools to enhance biodiversity, improve soil fertility, and strengthen resilience against dry climatic conditions. More than 1,000 students, teachers, and community members actively participated, gaining practical knowledge in tree care and environmental stewardship while fostering youth leadership through school-based environmental clubs. The initiative was implemented through effective coordination between YGAK, school communities, and supporting partners, ensuring smooth execution and resource mobilization. This effort reinforced environmental awareness among learners and established a strong foundation for continued tree management, climate adaptation, and sustainable conservation practices within participating school communities.

Strategic Pathway: 2022–2027

Plan Sprint

Guided by our 2022–2027 Strategic Plan, Youths for Green Action Kenya charts a bold yet achievable pathway toward large-scale environmental transformation. Building on the strong foundation of 705,000 successfully established trees, YGAK is committed to scaling its impact and reaching one million trees by 2027.

Gratitude & Partnership

We proudly extend our sincere appreciation and heartfelt gratitude to our valued partners and collaborators. Your trust, commitment, and shared vision have been instrumental in turning ambition into action. Together, we overcome challenges, unlock opportunities, and co-create lasting solutions—anchored in purpose, partnership, and a shared belief in a greener, more resilient future.

Thank you
